\*Energy Cost Adjustment (ECA)

An ECA shall be calculated on a monthly basis and is applicable to all energy sold by the Cooperative each month.

The DS&O monthly ECA is the difference in variable cost of energy (KEPCO ECA) charged each month by KEPCO and DS&O's ECA base, less Revenue Credit Adjustment and the Decommissioning Adjustment shown on the KEPCO power bill, multiplied by one plus the line loss adjustment.

An example of the ECA calculation shall be as follows:

KEPCO ECA	\$ 0.05165
Less Revenue Credit Adj.	- 0.00004
Decommissioning Adj	0.00021
Less DS&O Base ECA	0.06518
Total ECA	\$ 0.0137

This amount times the kWh consumption would be added to the monthly bill.

The difference of the ECA charged by KEPCO and the amount collected as the DS&O ECA as shown in the above example shall be applied to the following year ECA base.
