OBJECTIVE:

To specify how energy efficiency and conservation shall be addressed by DSO, including what DSO shall do regarding its own energy use, and what DSO shall offer its members and employees in terms of energy efficiency and conservation programs and education.

POLICY:

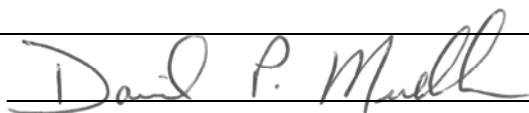

In terms of energy efficiency and conservation, DSO shall do the following:

- A. Place value on energy efficiency and conservation when designing, constructing, and using buildings for employees and members, and when purchasing and using vehicles and equipment.
- B. Develop and implement programs for members that emphasize energy efficiency and conservation. Examples of such programs may include weatherization, energy audits, and rebating of energy efficient appliance purchases.
- C. Provide information to members on energy efficiency and conservation through various mediums, such as DSO's web page and newsletters.
- D. Work with trades, vendors, and other stakeholders to help educate members on energy efficiency and conservation.
- E. Provide training on energy efficiency and conservation for all employees, as is practicable.
